DETAILED ACTION

Election/Restrictions

- I. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 28, 50 – 52 and 57, drawn to a rotational angle detecting device, classified in class 73, subclass 862.331.
 - II. Claims 35 – 38, 42, 43, 48 and 49, drawn to a rotational angle detecting device, classified in class 73, subclass 862.193.
 - III. Claim 65, drawn to a torque detecting device, classified in class 73, subclass 862.328.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention II has separate utility from Invention I such as angle calculating means for calculating a rotational angle of the rotational member and means for detecting a maximum value and a minimum value of the detection signal. Invention III has separate utility from Invention II such as two sets of one or a plurality of targets and correcting means for calculating an average value of the signals. Invention I has separate utility from Invention III such as first, second and third judging means. The following claims are not included in the above inventions for the following reasons: Claims 30 and 32 – 34 depend from claim 29, which was withdrawn. Claims 44 – 47, 58 – 64 and 66 – 68 are improper multi-dependent claims.

Art Unit: 2855

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Because these inventions are distinct for the reasons given above and the search required for Groups I and II is not required for Group III, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Michael Mutter on March 30, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

8. Any inquiry concerning this communication should be directed to Examiner Octavia Davis at telephone number (571) 272 - 2176. The examiner can normally be reached on Monday - Thursdays (9:00 - 5:00), Fridays off.

Art Unit: 2855

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Lefkowitz, can be reached on (571) 272 - 2180. The fax phone number for the organization where this application where this application or proceeding is assigned is (571) 273 - 2176.
